

**Are you getting ‘*bang for your buck*’ when it comes to feeding?
Do you know the *nutritional requirements* of your stock?**

Join us Wednesday, 18th October at the Roma RSL Hall (9am-3pm)

It is important to know that you are feeding your stock what they need and not paying for unnecessary extras. It is also critical to know if feeding is worth it and how long it can be sustained.

To help with these decisions, **Roger Sneath** will be giving a presentation on evaluating feed options relative to cattle nutrient requirements and will showcase available decision support tools. Roger is an Extension Officer with FutureBeef and has extensive experience with decision making, business management and herd management.

We can't tell you when it will rain, but we can help you make the most informed decisions you can for your business.

This information day is free, with light refreshments being provided.

*This event is being brought to you
by the GrazingFutures Project
“promoting a resilient grazing industry”*
