CLIMATE RISK WORKSHOP

Do you want to be better prepared for variable rainfall and temperatures? In just a few hours, you can learn the basics of assessing climate risk for the coming season.

The Queensland-Murray Darling Committee (QMDC), supported by GrazingFutures* and the University of Southern Queensland, invites you to hear from guest speakers:

- Queensland Department of Agriculture and Fisheries Climate Scientist David McRae
- Queensland Farmers' Federation Project Manager Ross Henry

About:

- variability of the Australian climate
- local examples of rainfall and temperature variability
- how to interpret forecasting products
- how to use forecasting as part of your property management planning
- agricultural insurance - its use as a risk management tool

Cost: Free! RSVP essential for catering purposes.

A complimentary lunch (at Dirranbandi) and dinner (at St George) follow each workshop.

Dirranbandi
