

Indian Myna Control Workshop

 St George Riverside Amphitheatre
From 6pm - 7:30pm

Have you seen this bird?

Indian Myna populations are slowly moving west. Join QMDC for this event to understand the impact Indian Mynas are having on our native bird populations and what we can do to reverse this trend.

Guest Presenters:

- Local twitching expert Sandy Robertson
- QMDC Aboriginal Ranger William Taylor

The workshop will explore:

- Why mynas are a problem in St George
- The impact on native birds
- How to identify Indian Mynas
- Trapping, tracking and monitoring techniques
- A success story: Inglewood's Indian Myna Control Program, and
- How you can help in your area

NOTE: A BBQ will take place after the workshop. Please ensure you bring a coat to allow for the cooler weather!

RSVP essential by 11 May, 2018
To: QMDC's Holly Hosie on 0428 738 559
